

ECO-RAIN SYSTEMS OF AMERICA CASE STUDY

Green Roofs

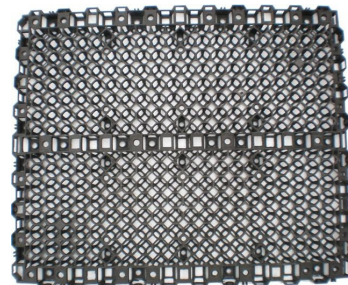

Casa Feliz, San Jose, CA

Casa Feliz is a low-income housing development with innovative designs. EcoRain Systems donated the EcoRain 1" Drainage Cells for these green roofs.

Rana Creek Living Architecture designed the landscape features for this apartment building in San Jose. They used the EcoRain 1" Drainage Cells under their biodegradable trays of Sedum plant species.

- Installed December 2008
- Approximately 1,500 square feet of EcoRain ER-301 1" Drainage Cells installed in three roof locations.
- EcoRain Drainage Cells were installed as drainage for the green roof under the solar panels (photograph below).
- Two other green roof areas serve as ornamental landscaping.

ET-1301 Eco-Rain
1" Drainage Cell
