

ECO-RAIN TANK SYSTEMS OF AMERICA CASE STUDY

Turf Pavers

Residential Driveway near Trenton, IL

Stuber Land Design selected EcoRain 2" Turf/Gravel Pavers for a residential driveway that has a slight slope. By using the Turf Pavers, tire weight is supported, thereby keeping the grass and soil in place—no divots, ruts, or compaction. Tires grip the Turf Pavers making it easy to drive up and down the slope.

- Installation May 2010
- 465 square feet of ER-401 EcoRain 2" Drainage Cells/Turf Pavers protect the grass with no divots from wheels.
- Installed in an area that receives occasional snow.
- EcoRain 2" Drainage Cells have an AASHTO H20 Load Rating.
- Tom Schafer of Stuber Land Design designed and installed the turf driveway.
