

ECORAIN™ TANK SYSTEMS CASE STUDY

Sonoma County Airport

Santa Rosa, CA

The second largest airport EcoRain Tank installation is now at the Sonoma County Airport. The airport has added a new runway—mitigation included installation of an EcoRain underground storm water detention structure.

- Installed July 2014
- 40,665 Cubic Feet Water Storage
- 6,354 EcoRain Half + Single Tanks—2.2' tall
- Designed by Mead & Hunt originally using Cudo
- Installed by O.C. Jones & Company

EcoRain Inspection/Cleanout Portal Tanks were installed.
